## EASY WETTA COIR PEAT BRICK

### Introduction

Benefits include :

- Manufactured from first grade Sri Lankan COIR
- When added to soils, Easy Wetta Coir-Peat Brick IMPROVES THE SOIL and SAVES WATER.
- Increases water-holding capacity and reduces watering frequency
- Improves plant growth
- Loosens hard clay
- Lasts in your soil for up to 5 yrs.
- Is a recycled natural source
- *RAPIDLY EXPANDS TO MAKE 9 LITRES OF COIR-PEAT*

### Ideal Applications:

- |                    |                     |
|--------------------|---------------------|
| • All Garden Soils | • Starting Seeds    |
| • Roses            | • Flower Beds       |
| • Potted Plants    | • Bulbs             |
| • Hanging Baskets  | • Vegetable Patches |
| • Orchids          | • Tropical Plants   |

### Application Rate:

#### **Improving potting mixes:**

Add 9 litres of Coir-Peat to a 25 litre bag of potting mix

#### **Making you own potting mix:**

Mix 9 litres of Coir-Peat, 9 litres of coarse sand (3/4 bucket) and 9 litres of pine bark or soil

#### **Pot plants & hanging baskets:**

Add 9 litres of Coir-Peat to a 10-12 litre bag of potting mix.

#### **Flower beds or vegetable patches:**

Mix Coir-Peat into topsoil to a depth of 150mm in the ratio 1 part soil to 1 part Coir-Peat.

#### **Expanding your Coir-Peat Brick:**

Place the brick into a 14 litre container. For quickest results, add 4.5 litres of warm water. The brick will expand to 9 litres of fluffy material in 10-15 minutes.
